Attempt all the questions.

CLO # 2: Recognize vector spaces and/or subspaces and develop their bases.

Q1:

[10 marks]

- a) Let V be the set of all ordered pairs of real numbers, and consider the following addition and scalar multiplication operations on $u = (u_1, u_2)$ and $v = (v_1, v_2)$:
- $$u + v = (u_1 + v_1 + 2, u_2 + v_2 + 2), \quad ku = (ku_1, ku_2)$$
- Identify the zero vector of the set.
- b) Consider the set $\{1, x + x^2, x^3\}$. Determine whether the set spans P_3 . Does the set form a linearly independent set in P_3 . (Solve by inspection. No calculation is required.)

CLO 2#: Recognize vector spaces and/or subspaces and develop their bases.

Q2:

[20 marks]

- a) Let S be the set of all vectors of the form $(2t, 0, -t)$. Determine whether the set forms a subspace in R^3 .
- b) Express $(-9, -7, -15)$ as a linear combination of $u = (2, 1, 4)$, $v = (1, -1, 3)$, and $w = (3, 2, 5)$.
- c) The vectors $v_1 = (1, -2, 3)$ and $v_2 = (0, 5, -3)$ are linearly independent. Enlarge $\{v_1, v_2\}$ to a basis for R^3 .
- d) Obtain a basis for the solution space of the homogeneous linear system, and compute the dimension of the space.

$$x_1 - 3x_2 + x_3 = 0$$

$$2x_1 - 6x_2 + 2x_3 = 0$$

$$3x_1 - 9x_2 + 3x_3 = 0$$
